### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Claims 1 to 7 are allowed over the prior art of record. Current invention teaches a thermistor having a variable resistance part and a heating part integrally formed from the same material in the form of a sheet, the heating part and the variable resistance part forming a non-overlapping section of the sheet, wherein the heating part being in contact with the third electrode. Applicant's arguments are persuasive and therefore are incorporated into this reason for allowance in its entirety. Specifically, regarding the overlapping electrodes placed on opposite sides of the thermistor material, where, "i.e. that there is a third electrode (comprising 531 and 533), there is overlap with one of the other electrodes, which is distinctly different from the present claims." In other words, the electrodes overlap either viewed from the left or the right side of the page, shown in fig. 5 of Chu.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
